

# Cannabis and Hemp

Increased water absorption

Decreased fertilizer due to better uptake

Increased root mass and plant growth

Better yields

Higher Tetrahydrocannabinol (THC) or Cannabidiol (CBD)

## Expert Water Solutions

Aequion is a water solutions company that reduces air, water or soil pollution for agriculture. Applications include traditional “in ground” growing, substrate or hydroponic crop production.

Please reach out to learn more about our services and to discover what Aequion can do for you!
